of Norton  
100 West Main Street  
Norton, MA 02766

## Sedation Dentistry

Most of us have been faced with anxiety when going to the dentist. It is natural to be fearful of having to confront pain and anxiety in order to better our dental hygiene. Things have just become easier. Conscious sedation dentistry has now made visits to your dentist more comfortable and more productive. Only one percent of dentists in the entire country are qualified for this safe proven program.

## Comfort and Safety

Sedation dentistry allows your dentist and qualified staff to treat patients while they are comfortably resting during dental procedures. This allows extensive procedures to be completed in less time per visit or fewer visits. Less anxiety and little discomfort, as well as no memory of the treatment, are benefits.

## Am I conscious while the work is being done?

With sedation dentistry, a wide range of medications is available to suit individual needs. With conscious sedation, the medicine has an amnesia quality, reducing memory of the visit. Being relaxed makes the patient more comfortable and allows more work to be done per visit. Conscious sedation allows patients to nap lightly; however, you are able to respond to verbal commands and communicate should the need arise. Your dentist and a qualified team monitor your blood pressure and oxygen levels at all times. You are always accompanied by professional staff. If necessary, alternate medications are available to reverse the effects of medication if needed.

*Our focus is a safe comfortable visit for you and your family.*

*Comfortably rest during treatments.*

# Sedation Dentistry

## Working together with your dentist

Discussing your health background, as well as any medications you might be taking allows your dentist to take the most caring and professional approach to your dental needs. Medical history, allergies, problem medications or dependencies are all taken into consideration to make your visit as safe, productive and comfortable as possible.

## Insurance

On your first visit, bring your dental insurance information to ensure maximum benefits. We file all insurance claims for you to ensure proper coding and submission. Dental insurance is intended to help cover some, but not all, of your dental care. Most plans include a deductible or partial payment for services.

## Financial needs

Quality, affordable dental care is our main concern. We work with financial institutions that offer 12 month payment plans interest free. We also accept Visa, MasterCard, Discover, American Express and checks.

*We happily file all insurance claims for you. This ensures proper coding and submission, making your visit easier.*
